The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 1-11, 13-17, 19-23 are rejected under 35 U.S.C. 103(a) as obvious over Horiguchi, IEDM.

The previous rejection still applies. The new limitations regarding a smaller floating gate capacitance than control gate capacitance do not make the claims patentable because the same also applies to Horiguchi. Clearly the capacitance between the control gate and floating gate is larger than the capacitance between the floating gate and channel because the control and floating gates face each other along a larger area. The new limitations do not make the claims patentable.

Claims 1-23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Horiguchi in view of Watanabe or Hong.

The previous rejection with the above comments applies.

Applicant's arguments filed 3 September 2002 have been fully considered but they are not persuasive. Applicant argues that his device can be programmed at a lower voltage than Horiguchi, however, no voltages are claimed, nor is there unequivocal evidence to prove applicant's assertion.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
